ReSAKSS DATA CHALLENGE

The ReSAKSS Data Challenge is a competition for enthusiastic data users to showcase their creativity and analytical skills by using data and other resources on the ReSAKSS website to develop an innovative knowledge product that addresses a development challenge faced by Africa.

Explore the wide range of resources: data, reports, reviews, publications and much more on the ReSAKSS website, showcase your most ingenious innovation, and add your voice to the debate!

Enter the competition under one of four categories:

 Essay and Report  Visual Art

 IT Product and Service  High-school project.

The prizes to win for each category are the following

\$ 2000

\$ 3000

\$ 1000

ABOUT ReSAKSS

Established in 2006 under the Comprehensive Africa Agriculture Development Programme (CAADP), the Regional Strategic Analysis and Knowledge Support System (ReSAKSS) supports efforts to promote evidence- and outcome-based policy planning and implementation. In particular, ReSAKSS provides data and related analytical and knowledge products to facilitate benchmarking, review, and mutual learning processes. The International Food Policy Research Institute facilitates the overall work of ReSAKSS in partnership with the African Union Commission, the NEPAD Planning and Coordinating Agency, regional economic communities, and Africa-based CGIAR centers.

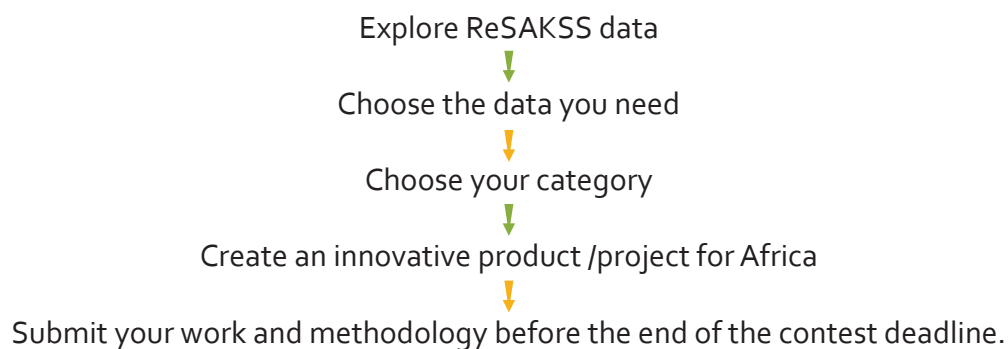

The ReSAKSS website www.resakss.org provides continental, regional and national level data and related analytical and knowledge products on the CAADP implementation agenda. This includes a variety of resources: data, charts, maps, technical reports, and other publications related to African economies. The data and other resources available on ReSAKSS cover agriculture, environment, health, economic growth, nutrition, climate change, poverty, and other topics.

The ReSAKSS eAtlas platform, featured on the ReSAKSS website, is a country-level geographic information system (GIS) based mapping tool. It provides high-quality disaggregated and subnational data on agriculture, socioeconomics, demography, health, infrastructure and biophysics for 23 African countries.
